

TAX-FREE EXPAT 3-PHASE CONSULTATION

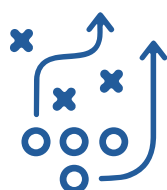

Phase I - Understanding the Foreign Exclusion and Planning the Proper Structure

To begin, we provide the knowledge you need about the United States system of worldwide taxation and how foreign-based income is excluded. From offshore sourcing rules, the requirements of the Foreign Earned Income Exclusion, and Foreign Corporation advantages will help you understand these basic principles to become tax-free. From there, we help you choose the proper structure and jurisdiction and develop an international tax structure that suits your needs.

Phase II - Entity Formation, Banking, and Payment Processing

Upon determining that your income will be foreign-sourced and that you qualify for the foreign exclusion or credit, the next step is to implement your plan in real-world action items: coordinating with Legal Counsel in the Chosen Jurisdiction, Digital Banking Application & KYC, and Payment Processing Account Creation & Testing.

Phase III - Accounting & Document Compilation

In the final phase of becoming a Tax-Free Expat, we help you with Financial Statement Preparation & Projections, as well as Document Review for Tax Return Preparation. From there, we guide you through how to maintain your structure and the concepts you need to remain successful.
